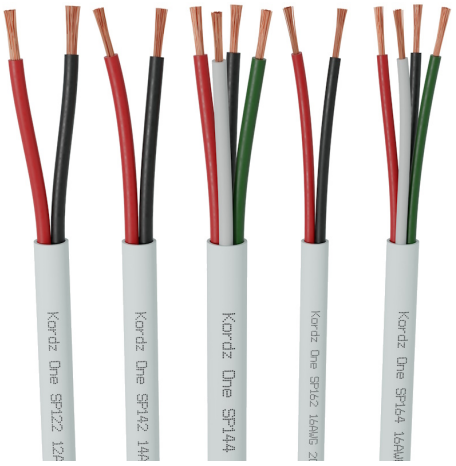
ONE Speaker Cable

Makes installation easier

Kordz ONE Speaker Cable ensures clear and dependable sound transmission. It features high-purity medium stranded 99.99% Oxygen Free Copper (OFC) conductors and is carefully engineered to enhance both conductivity and flexibility. The polished copper conductor surface minimises oxidation and increases longevity. This cable enables a wide range of professional AV installations with 12, 14, and 16 AWG configurations and a choice of 2 or 4 cores. Thoughtfully designed with ease of installation in mind, these cables are optimised for hassle-free installation with easy-glide jackets available in either PVC or LSZH construction. The Reel-in-Box packaging simplifies installation, reducing the risk of snags, twists and curls. Metre-marked for convenience and available in multiple colours, Kordz ONE Speaker Cable is the dependable choice for any high-quality AV system, backed by Kordz' promise of 'Connectivity Assured'.



- High-grade 99.99% Oxygen Free Copper (OFC) conductors for enhanced conductivity
- Polished conductor surface to minimise oxidation
- Medium stranding for balance of power handling and flexibility
- Available in 12, 14 and 16 AWG configurations and a choice of 2 or 4 cores
- Industry-standard internal wire colour coding (red, black, green, white)
- Easy-glide outer jacket available in multiple colours
- Available in LSZH or PVC constructions
- Conveniently packaged in a Reel-in-Box delivery system that's easy to identify in a van or on site
- AS/NZS S008:2010 compliant
- RoHS compliant

Length figures are based on copper resistivity at 20°C (68°F) shown here. Resistivity and cable power loss both increase with temperature. For example, to cap power loss at 11% to an 8Ω speaker, 16AWG cable should be limited to 36m (118ft) at 20°C (68°F) or 30m (100ft) at 75°C (167°F).
