

FEATURES

Description

Wallmount fiber distribution unit designed to support patching and splicing in one unit. The enclosure has 4 adapter panel positions, allowing for a wide variety of fiber termination connector types. Two compartments separate the network terminations from the distribution terminations and the unit has a single outer door with optional key lock.

INSTALLATION

The SSF-MWM-SOLID-WL-E4 / SSF-MWM-SOLID-NL-E4 is designed for indoor installation. It can accept up to four SSF™ adapter plates.

1. Select a vertical indoor wall surface with easy access and adequate clearance from other fixtures and power circuits. Installation location should be near a suitable earth ground.

2. Utilize a plywood backer board or fastener anchors as appropriate to the install surface.
3. Mark and install appropriate wall hanging hardware and secure the unit.
